

PN 16 FLANGE GATE VALVE, ROW 14, 2100

WITH REPLACEABLE STEM SEAL

Purpose

- Drinking water installations.
- In industrial, sewage and other chemically neutral fluids installations (applies to DN40 and DN50).

Authorisation

- National Institute of Public Health PZH.

Technical data

- Operational pressure PN16.
- Max temp. for water- 40°C.
- Max temp for other fluids- 70°C.
- Flanged connection according to PN-EN 1092-2.
- Installation length according to PN-EN 558+A1.
- Maximum closing torque MOT=1xDN [Nm].
- Requirements and testing according to PN-EN 1074 – 1 and 2.
- Industrial valves PN-EN 1171.

Design features

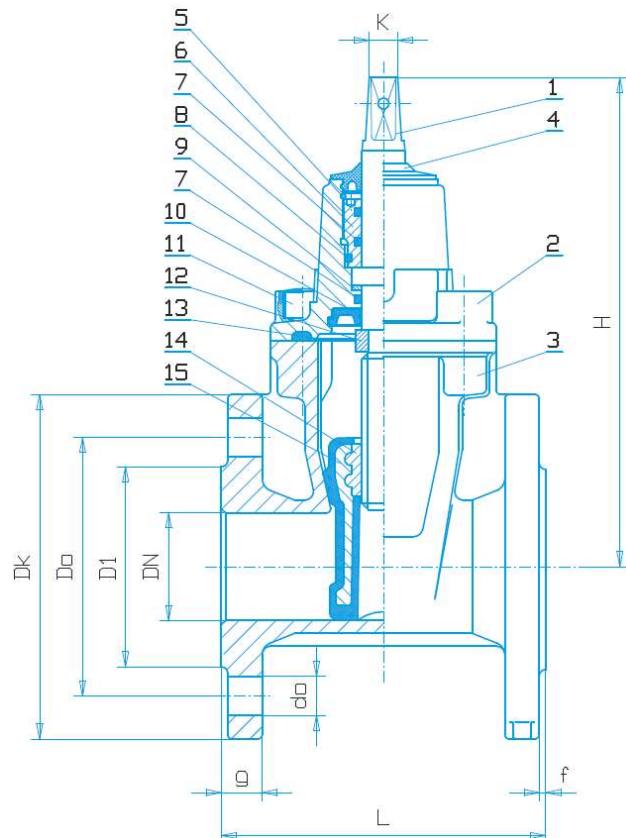

- Full, smooth and cavity-free passage.
- Possibility of replacing the valve stem seal under full pressure at any wedge position.
- Brass screw plug for valve stem seal (replaceable) secured against unscrewing with a stainless steel ring placed inside the cover under the top seal.
- Stainless steel stem with cold-rolled thread, without cuts in the sealing zone, enabling cooperation with O-rings placed inside the screw.
- Body and cover made of grey cast iron grade EN-GJL 250 or ductile cast iron grade EN-GJS 500-7.
- Triple stem seal system: upper wiper seal, set of 3 or 4 O-rings, lower lip seal.
- Lower washer made of polyamide PA6, which is a sliding washer securing low-friction bearing of the spindle (stem).

- Wedge made of ductile cast iron vulcanized inside and outside with EPDM or NBR rubber with a hardness of $70\pm5^{\circ}\text{Sh}$. guided by the tongue and groove method in guides that are an integral part of the valve body.
- Wedge suspension nut on the stem- nonreplaceable, made of brass, hot-dipped in the wedge of the gate valve eliminates wedge vibrations.
- Bolts connecting the cover to the body - blind threads, fully protected against corrosion with paraffin-wax compound.
- Internal and external anticorrosive protection with epoxy powder paint RAL 5015 with coating thickness of min. 250 μm , resistant to 3kV flashover.

No.	Part	Materials
1.	Spindle	Stainless steel 1.4021
2.	Cover	Ductile iron EN-GJS 500-7 Grey cast iron EN-GJL 250
3.	Body	Ductile iron EN-GJS 500-7 Grey cast iron EN-GJL 250
4.	Top seal	EPDM / NBR rubber*
5.	Locking ring	Stainless steel 1.4301
6.	Screw	Brass
7.	O-ring	EPDM / NBR rubber*
8.	O-ring	EPDM / NBR rubber*
9.	Bottom washer	Polyamide PA6
10.	Bottom seal	EPDM / NBR rubber*
11.	Cover screw	Galvanized or stainless steel
12.	Retaining nut	Brass
13.	Cover seal	EPDM / NBR rubber*
14.	Nut	Brass
15.	Wedge	Ductile iron EN-GJS 500-7 EPDM / NBR rubber*

*applies to DN40 and DN50
