

## COLUMN DRINKING FOUNTAIN FOR PUBLIC USE 3470

### Purpose

- Drinking water

### Authorisation

- National Institute of Public Health PZH

### Design features

- Construction of the sprinkler made on the basis of stainless steel.
- Elements in contact with water made of corrosion resistant materials.
- Connection to water supply system  $\frac{1}{2}$ ".
- Water outlet is regulated by a pressure reducer.
- The tap is activated manually by pressing the valve.
- Dimensions: total height 1000mm (to the bowl 975mm), column 150mm x 150mm.

No.	Part	Materials
1.	Column	Stainless steel
2.	Large column cover	Stainless steel
3.	Small column cover	Stainless steel
4.	1/2" nozzle	Stainless steel
5.	Stainless steel bowl with siphon	Stainless steel
6.	Stainless steel bowl screw	Stainless steel
7.	Fountain valve	Stainless steel
8.	Valve washer	Stainless steel
9.	Connection pipe back nut	Stainless steel
10.	Cast iron bowl	EN-GJS 500-7
11.	1/2" pressure reducer	Brass
12.	M8x30 Allen screw	Galvanized steel
13.	Siphon	
14.	Drain elbow	PA6 Polyamide
15.	16x2mm drain hose	Silicone
16.	16x2mm bowl drain hose	Silicone
17.	3/8" angled supply hose to 1/2" L=1000	
18.	3-8" L 20mm extension	Brass
19.	M6x30 screw with lentil head	Stainless steel
20.	Column base	Stainless steel
21.	Reducer bracket	Stainless steel
22.	Column cap	Stainless steel

### POSITIONING OF HOLES IN THE BASE
